

**Alex Bourlier**  
Co-founder  
**Startin'blox**

Entrepreneur for 10 years. Alex Cofounded Happy Dev with Sylvain Le Bon, the biggest freelancers collective in Europe, before launching Startin'blox in 2018 with the vision that data interoperability will become the norm. Startin'blox has developed an open source application builder, or an open source framework to build applications, that are natively sovereign and interoperable. It relies on open standards such as Solid, IDS or Gaia-X and is particularly active within the Data Spaces ecosystem. Alex recently became host speaker on "The Data Space" podcast, addressing how companies exchange data in a sovereign way.

A promotional banner for a workshop. The background is orange. At the top left, it says "Web technologies for applications" in white and "Workshop" in red. To the right, in a white box, it says "[ 13 June | 9h00 - 14h00 | PARIS ]". In the center, a red box contains the text "Talk : Using Solid to build a data protecting MiniApp ecosystem". On the left, there is an illustration of a smartphone with a rocket launching from its screen. On the right, there is a circular portrait of Alex Bourlier. Below the portrait, it says "Alex Bourlier" and "co-founder of Startin'blox". At the bottom left, it says "Sponsored by" with logos for HUAWEI and STARTIN'BLOX. At the bottom right, it says "An event" with logos for CW2, W3C, and Systematic.
