HORIZON 2020 – Open Source

Call : Next Generation Internet (NGI)
Topic : ICT-57-2020: An empowering, inclusive Next Generation Internet

Informations générales
- Type d’action : RIA
- Budget par projet : €2-4m
- Budget total disponible : €7m
- Deadline : 22 avril 2020

Domaines d’actions
- Develop novel mobile applications translating between speech and sign languages to assist people with hearing impairments.
- Projects should explore how end-users can best interact and cooperate with the application and how the system adapts to users in real-life conditions and prevents unintended gender bias in translation.

Intérêt Open Source :
« The resulting applications should be open source, robust, cost-effective and validated across a wide spectrum of users. »
