# Opportunity Areas

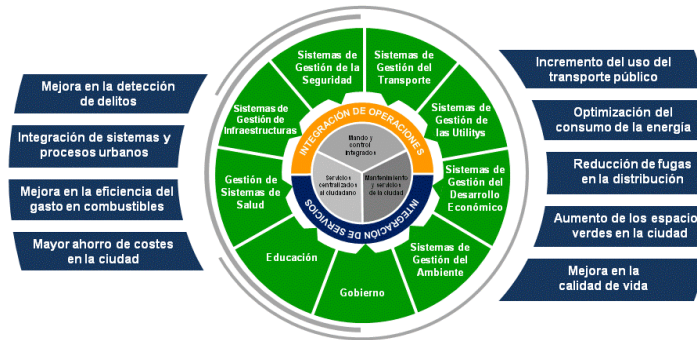

- The **Strategic Plan 2017 - 2020** aligns the offer of the companies of the sector towards the specialization in the development of **Projects** referring, in Clave of **Collaborative Innovation**, in three **Spaces of Opportunity**.

**Smart Industry**  
Industry 4.0 & Energy

Models and systems for management and improvement of processes, products and organizations:

- Service and Business
- Energy Management
- New Economy Services in Industry 4.0

**Smart Territory**

Advanced infrastructure and platforms:

- Governance
- Sustainable Environment
- Digitized services for citizens and businesses
- New Economy Services in Industry 4.0

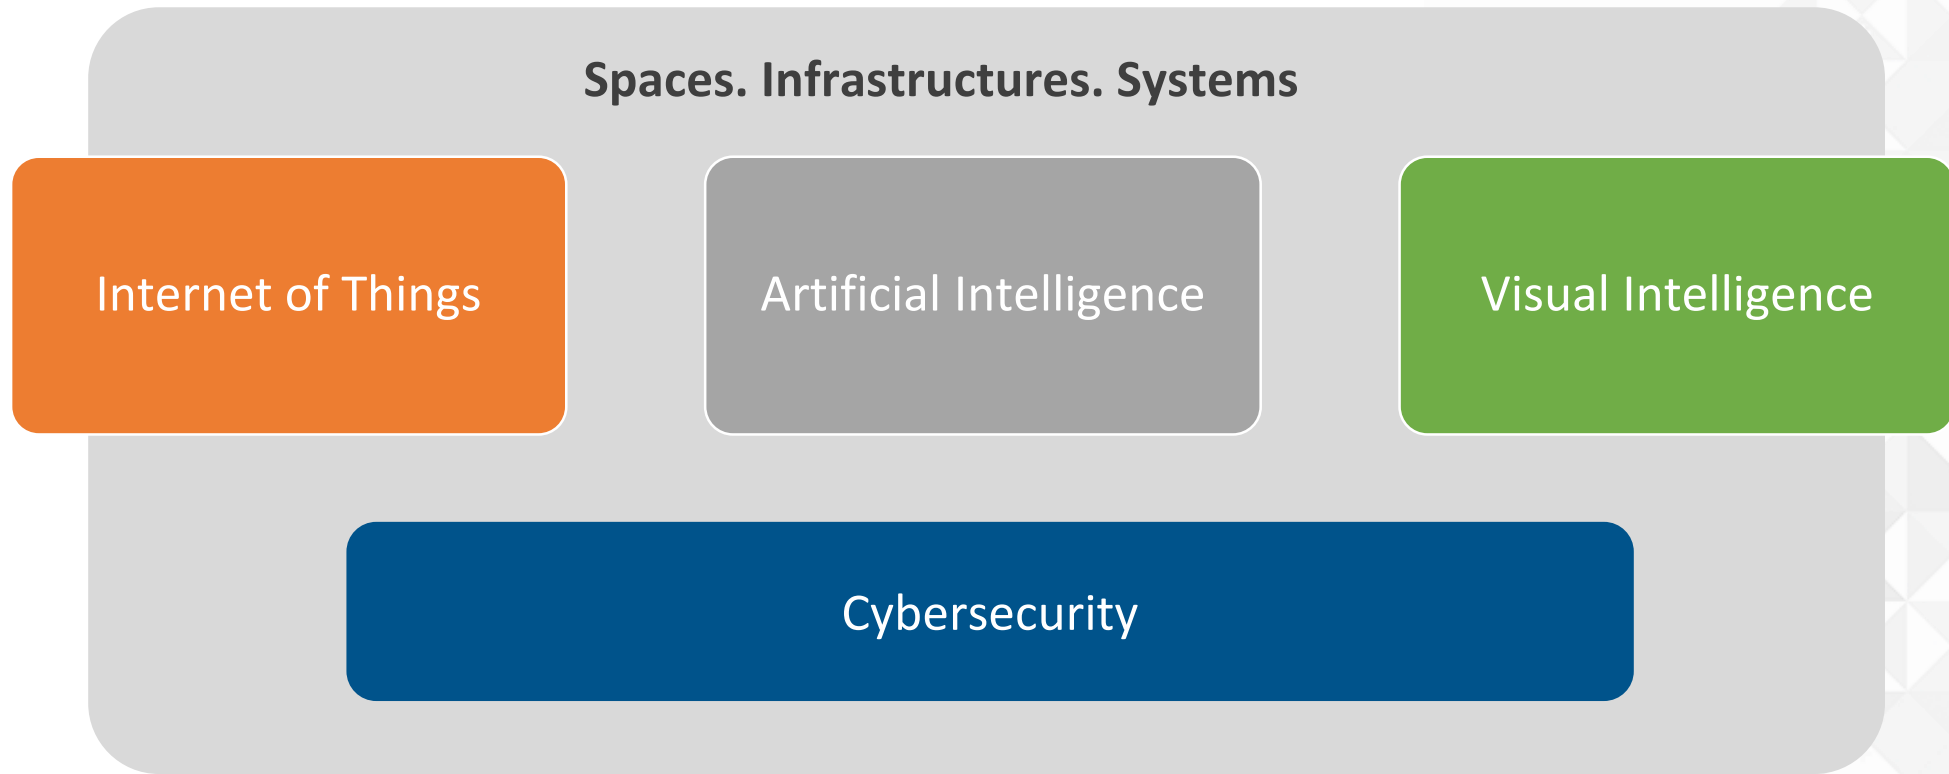

**Smart Society**

Advanced systems for the promotion and improvement of citizen-centered areas:

- Talent and entrepreneurship.
- Citizens' living environment.
- Participation and Communication
- New Economy Services in Society 4.0

# The era of Edge Computing for GAIA

## - GAIA Matrix Strategy–

**BIG DATA**

**ARTIFICIAL  
INTELLIGENCE**

**MACHINE  
LEARNING**

**MOBILE  
DEVICES**

**IOT e IIOT**

**CLOUD**

**BLOCKCHAIN**

**GAIA**

# Intercluster Cooperation: Edge Computing

**EDGEIN PROPOSAL  
(2020)**

**INNOSUP-01-2018-2020  
call**

- This project will seek to develop a new European value chain bringing together solution providers working with Edge Computing with relevant end-users expressing needs like for instance predictive maintenance by bridging the gap between innovative SMEs and startups and industrial end-users via dedicated open calls.
- There is an opportunity for European stakeholders to experiment with Edge computing in real-setting industrial cases and also for clusters through facilitation of connection between innovative SMEs and startups deploying solutions using Edge computing and for instance large industrial end-users.
